

THE VALUE CHAIN

Investment team's operating brain.

Every investment decision runs through decks, calls, notes, models, CRM updates, market signals, and portfolio movements. Most of that work is still manual. A personalised AI ecosystem can sit across your workflow, from **deal briefs and diligence** to **portfolio pulse, LP memos, and market briefs**, so every deal is covered, every signal is tracked, and investors spend more time on judgment.

TODAY • WHERE THE TEAM'S TIME GOES

TOMORROW • AI TAKES THE MANUAL LAYER

INVESTOR ASKS THEMSELVES	A CUSTOM AGENT HANDLES	INVESTOR FOCUSES ON
"Which deal needs me first?"	Deal Brief	Sourcing partnerships
"What's the real story here?"	DD Diagnosis	Higher-conviction calls
"How is my portfolio?"	Portfolio Pulse	Proactive value-add
"What goes to LPs?"	LP Memo	Aligned investor relations
"What's moving in market?"	Market Brief	Sharper thesis
Faster time to conviction From cold deal to investment memo, in hours.		Every deal covered, none slipping Track the full funnel without losing signal.

From data, in seconds. To conviction, with context.

— THE PLAYBOOK

The investor's go-to playbook.

Five custom AI agents the team runs on demand, plus an always-on intelligence layer keeping watch in the background.

THE AGENT SET • 5 PLAYS + INTELLIGENCE

ON DEMAND / ALWAYS ON

01

Deal Brief

Score, summarize, and surface the deals that need you first.

02

DD Diagnosis

Synthesize all your due-diligence inputs into one read.

03

Portfolio Pulse

Spot what's changing across portcos before it becomes a fire.

04

LP Memo

Portfolio shifts turned into a tight investor update.

05

Market Brief

Comps, news, and moves in your sectors, packaged tight.

ALWAYS ON

Intelligence

Tracked signals and highlights, watching while you work.

Actionable insights

Surface what matters

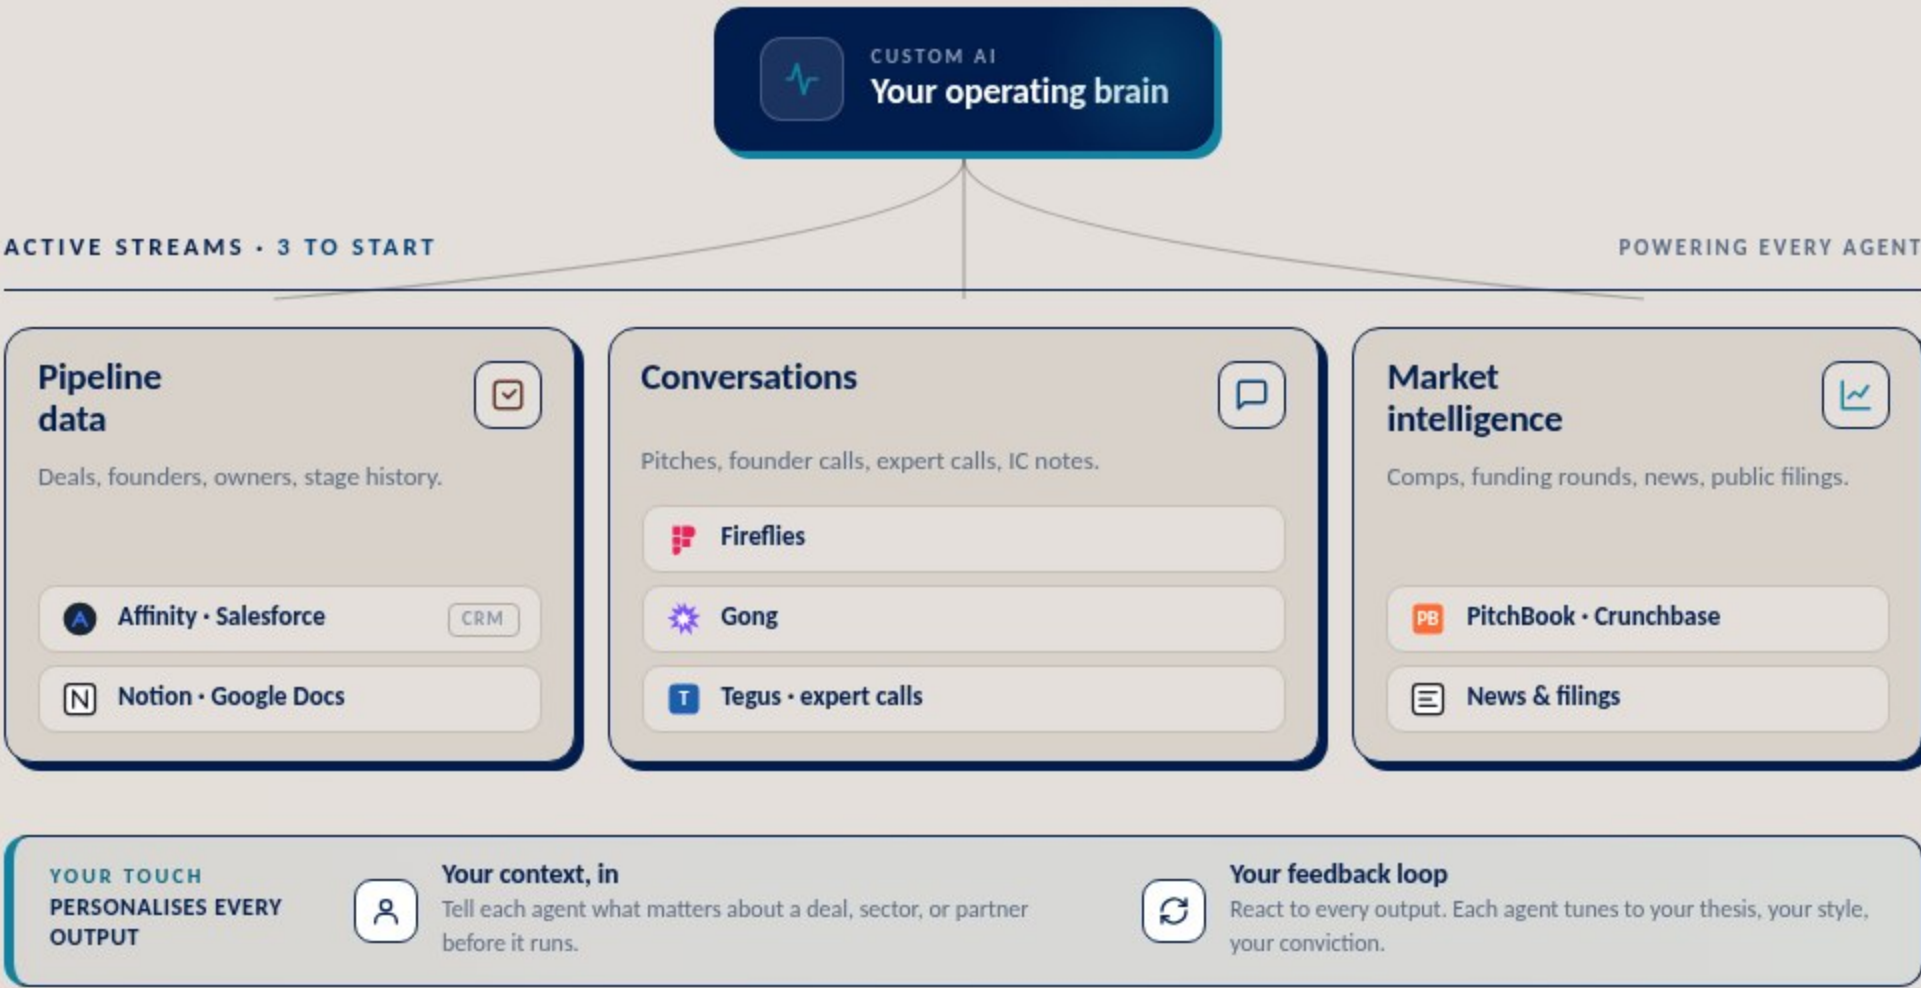

The playbook gets written first. Then it keeps expanding.

Every agent above is custom — tuned to your thesis, your sectors, your funnel, the way you actually work. New use cases shape new agents.

— THE DATA LAYER

Powered by what you already see.

Each agent draws on the deal flow, the conversations, and the market signals you already track. The more sources we plug in, the sharper every recommendation.

PLUG-INS • EXPAND AS THE PLAYBOOK GROWS

SAME AGENTS, SHARPER SIGNAL

— DESIGN PARTNERSHIP

30 days. One use case. Real value, first.

A design partnership that ships a working agent on your team's data. Start with the highest-leverage use case, prove value, then expand the playbook from there.

THE ROLLOUT • 5 STAGES, ONE USE CASE

EACH STAGE CLOSES WITH A REAL ARTEFACT

GOAL Deliver *value first*. Then expand from there.

30 days
TO FIRST AGENT

1 use case
END TO END
